

Tick Prevention Week

12th - 18th April 2010

www.tickpreventionweek.org

Up to 3,000 tick bites in the UK and Ireland each year result in Borreliosis (Lyme disease). There are no vaccines to prevent infection. Awareness is the only defence. Make sure you and your family are 'Tick Aware'!

This year we would like you to get involved and **DO ONE THING** to raise awareness. Find out what Jack, Lucy and their family are doing to protect themselves, and to help raise awareness, by visiting:
